**Armageddon Now**

*The End of the World A to Z*

*Jim Willis and Barbara Willis*

So you don’t believe we’re on the eve of destruction? Authors Jim and Barbara Willis mine the religious and secular divide as they examine the history of apocalyptic beliefs in *Armageddon Now*. The authors explain the various omens and prophecies as well as the actual events that may trigger the end, such as collisions with asteroids, nuclear war, the oil crisis, global warming, and famine. But as the authors point out, there have always been plenty of signs pointing to the boom in gloom: predicting the order of finish kept Nostradamus in print for centuries, and the ancient Mayans helpfully projected that calendar sales would drop to nothing after 2012. They are all part of the long history on the end of history.
