## Plagues, Pandemics, and Viruses

From the Plague of Athens to COVID-19

Heather Quinlan

It can come in waves—like tidal waves. It changes societies. It disrupts life. It ends lives. As far back as 3000 BCE (the Bronze Age), plagues have stricken mankind. COVID-19 is just the latest example and shows that we should not expect relief anytime soon. Yet, life continues, and knowledge and social cooperation can save lives.

From the plague of Athens to the COVID-19 pandemic, *Plagues, Pandemics, and Viruses* covers the history, causes, medical treatments, human responses, and aftermaths of the world's biggest pandemics as well as several modern diseases of note and those that are making a comeback. It chronicles the diseases that have inflicted humanity throughout millennia, including:

- The bubonic plague/black plague, which killed 30% to 60% of Europe's population
- The devastation to the indigenous population during the European colonization of the Americas
- The 1918 Spanish Flu, which likely originated in France or Kansas, not Spain
- How disease "inspired" *The Canterbury Tales*, *Wuthering Heights*, the art of Keith Haring and others
- AIDs "patient zero"
- The differences between COVID-19 and other corona viruses
- How climate change will affect future pandemics
- The aftermath of various pandemics
- Human resilience and how science, the medical community, and governments have conquered past epidemics; and much, much more.
